SAMSUNG

Samsung Twin Cooling System®

The days of inefficient, shared cooling are over. The French Door Refrigerator uses two independent evaporators, for two temperatures and two humidity levels – one for the fridge, one for the freezer.

Consistently cool: With Multi-blast Cooling, air flows out through multiple outlets on every shelf level, for even cooling throughout the refrigerator. After opening and closing the door, it quickly returns to the set temperature.

Twin Cooling Plus®: To maintain optimum freshness and flavor, refrigerated foods require humidity. (Freezer levels are kept low, so frozen food doesn't suffer "freezer burn.") Samsung Twin Cooling Plus keeps the fridge at a remarkable 75% level, compared to conventional brands at 17%. It's a professional grade system for your kitchen.

Refrigerator humidity levels:
Conventional brands 17%
Samsung Twin Cooling 43%
Twin Cooling Plus 75%

CoolSelect Pantry™: Enjoy many fridges within one fridge

CoolSelect Pantry lets you choose the temperature settings that meet your varying storage needs.

Chill 34°F: The ideal temperature to keep the natural moisture in fresh meat, poultry and fish – preserving taste and freshness.

Fresh 38°F: The optimal humidity level to keep fruits and vegetables fresh and crisp.

Deli 41°F: The perfect setting to keep meats and deli items fresh and ready to eat.

Note: CoolSelect Pantry available in select models.

More cool features: Variable moisture and space to make it perfect

Your food gets the moisture and room it needs; you get the light you need.

LED Lighting: The bright, yet energy-efficient interior light makes it easy to find whatever you're looking for; the compact light design leaves more usable space.

Note: LED Lighting available in select models.

Green Fresh Vegetable Box: Humidity-controlled crispener preserves the freshness of fruits and vegetables.

Dairy Box: Dairy products are safely kept in their own separate compartment.

Humidity Control Bar: Left-to-right movable bar provides breathable "gap" for optimal humidity in the drawer.

Cantilever Shelves: Maximize your storage space by moving or placing the shelf according to your needs.

More space means no more playing hide-and-seek with your food

Samsung's French Door Refrigerator puts all your food items, large and small, within clear view and easy reach. Storage is a snap with up to 29 cubic feet of room – one of the largest capacities in its category. Plus, handy compartments throughout make items easy to organize, retrieve and clean.

Auto Pull-Out™ Drawer: The large slide-out drawer features a movable divider that separates various types of food for easy organization.

No digging for frozen pizza: Handy, perfect-size "pocket" stores pizza boxes within easy sight and reach.

Milk is always at hand: Door Guard securely holds gallon-size juice or milk jugs in the door for easy access.

Easy-clean, wire-free bins: Give the bins a quick wipe for an easy clean up.

Flexible storage space: Strong, versatile pop-up shelf accommodates oversize items, as needed.

Thoughtful features that save time, space and money

Water and ice at a touch; instant access to all freezer items; energy-saving designs.

One Touch Pure Water Dispenser: Press and enjoy – pure water and ice are instantly accessible with this optional in-door, one-touch dispenser.

CoolTight Doors: Save energy costs with doors that automatically close tightly and securely.

Compact Icemaker: Plenty of ice for all your needs, thanks to an efficient, freezer-space-saving design that's almost half the size of conventional icemakers.

CoolSafeLock: Cool air never escapes, thanks to this smart sealing feature. Your food stays fresher longer – which saves you money.

EZ-Open Handle™: Opening the freezer just got easier. Simply lift the handle and even a fully loaded freezer glides out effortlessly.

ENERGY STAR® Compliant: Samsung's French Door Refrigerator uses 20% less energy than current standards require. Most Samsung appliances are compliant with ENERGY STAR requirements. Not only does this provide a lower operating cost, but also preserves the environment.
